FOCUS: Technology and Entrepreneurship that Strengthen Community.

Programming web applications since 1996, using the web to meet real needs in creative ways. Technical skills as a programmer are complemented by the business experience to manage projects from idea through completion.

COMPUTER PROGRAMMING: 1996 – current, Internet Application Developer.

Twelve years experience crafting dynamic web sites that create value beyond the web: currently Drupal, object oriented PERL with CGI, modperl, SQL database, Javascript and web page design. My largest projects: Shared Calendars, which integrates schedules throughout an organization, and SpaceShare, an ecological logistics company focused on carpooling. Recent clients include Drupal development for dnafiles.org and EraseRacism (under development).

SpaceShare Environmental Logistics and Networking.

Sole proprietor, 2002 – current

<http://www.SpaceShare.com>

Developing a variety of people–matching and resource–saving web sites. The first product is a logistics service for conferences & large events, helping attendees find well matched carpools and roommates. Written in Perl, mod_perl and CGI, using Apache and MySQL. In 2005 began using Drupal and PHP, integrating existing code into a Drupal framework.

Shared Calendars Internet Application.

Boutell.Com, Inc. 10/1996 – 3/2000, 10/2000 – 2001

<http://boutell.com/~cataldo/sharedcalendars>

During the first period, worked on a variety of projects including writing Shared Calendars Version 1; when initial sales were successful, returned to write Version 2. Responsible for all aspects of the project: designed and developed the program, wrote the sales web site, support customers. Shared Calendars was designed as an excellent choice for dispersed nonprofit organizations or small businesses relying on telecommuting.

Work for Varied Clients and Contract Projects.

3/2000–current

Gained experience meeting the needs of a variety of clients, completing projects on time and on budget. Projects included a wide variety of dynamic web pages: database–driven web applications, Java clients connected to Perl applications running on the server, and a modified version of Shared Calendars used as a project management tool.

BUSINESS EXPERIENCE: 1991 – 1996, Founder of the Heart Cafe.

Created the Heart Cafe, promoting and selling healthy vegetarian food, exposing students to new ideas in ecological and compassionate dining. Oversaw growth from small outdoor cart to permanent location with seasonal revenues approaching \$10K per week. Developed concept and then enlisted the Partnership of ARAMARK, Inc.

Responsibilities included:

- Hiring and training of both management and staff.
- Management of operations.
- Marketing for cafe, including design of menu and advertisements.
- Budgeting, operational cost analysis, and accounting.

COMMUNITY INVOLVEMENT: Leadership in many volunteer organizations.

Have been consistently involved in the leadership of community organizations for more than a decade. Experienced in leading organizations, coordinating volunteers, advertising activities, facilitating meetings, developing media campaigns, and discussing issues through lectures and interviews.

Activities included:

- Technical Team Lead for BAIDO.
- Founded Volunteer Seedlings.
- Tobacco Education Presentations in middle and high schools.
- Volunteer Coordinator of Seattle Green Party.
- Founded Delaware chapters of INFACT and EarthSave.

GRADUATED MAGNA CUM LAUDE: Physics, Economics, Political Science.

Honors: Phi Beta Kappa; Omicron Delta Epsilon (Economics); Pi Sigma Alpha (Political Science); Special Merit Award in Political Science; Special Merit Award in Economics; National Merit Scholarship.

University of Delaware

- Bachelor of Arts in Physics and Political Science, 1990.
- Bachelor of Science in Economics, 1994.
